To Whom It May Concern,

As a Summer intern from May to August 2021, Hannah Arnett reported to me, working with myself and two other Developers.

In general, she was responsible for developing complex email templates using HTML/CSS. We deploy highly personalized, dynamic templates, which required that she problem-solve and utilize several coding languages, including Shopify Liquid.

Hannah was a quick learner and exhibited a terrific work ethic. One of her main projects was to Design and Develop a new set of "evergreen" templates that could be used in a variety of customer communications journeys to increase engagement.

Hannah has strong communication skills that were very useful in collaborating with a large team of key company stakeholders. She asked questions to understand the scope of projects assigned to her and quickly became comfortable with everyone on the team.

With Hannah's solid technical skills and team spirit, I believe she would be a great asset to any company.

Sincerely,

Samantha Lespier
Manager, Email Design and Development
